

Clearly

the better choice

SAFETY SERVICE SATISFACTION

Heritage-Crystal Clean, LLC (HCC) is a national leader in the environmental services market, providing the smart alternative. Founded in 1999 by a team of seasoned industry professionals, HCC operates a nationwide network of branches serving the continental United States. HCC operates more than 85 service branches across the nation and multiple waste recovery centers, including an oil re-refinery, regional antifreeze recovery centers, and several wastewater treatment facilities. Whenever possible, HCC disposes of waste it collects in an environmentally sustainable way, recycling waste for reuse or disposing of in a waste-to-energy process.

Crystal Clean®

Heat Transfer Fluid Program

*Full Service for Supply,
Analysis, and Disposal*

PROGRAM OVERVIEW

Heritage-Crystal Clean's Heat Transfer Fluids program is designed to meet the specific needs of your operation. Our concentrate or premixed ethylene glycol-based and propylene glycol-based transfer fluids are suited for a variety of applications.

Crystal Clean has the infrastructure needed to become your centralized vendor for supply, installation, maintenance testing, and disposal services. Whether you need fluid installed, tested, or disposed, our professional sales and service reps are committed to ensuring jobs are done fast while maintaining the highest level of safety and full environmental compliance.

PROGRAM HIGHLIGHTS

Ethylene Glycol And Propylene Glycol-Based Heat Transfer Fluids

Concentrate or Premixed Ready-To-Use Blends

Bulk, Tote, or Drum Size Quantities

Installation Services Available

Environmentally Responsible Disposal Options

Analytical Testing: Routine or One-Time

Compliance With Federal, State, and Local Regulations

PRODUCTS

Concentrate and ready-to-use premixed fluids are available to meet the specific needs of your operation. All heat transfer fluids are sold in drums, totes, and bulk.

Industrial Heat Transfer Fluid

- Ideal for wide range of applications
- Applications include HVAC, solar heating, floor/ground heating, process cooling/heating, and more
- Propylene Glycol-based and Ethylene Glycol-based formulations available

Stationary Engine Heat Transfer Fluid

- Formulated for stationary engine applications
- Applications include natural gas processing, power generation, compressor engines, and other heavy-duty applications
- Propylene Glycol-based and Ethylene Glycol-based formulations available

Winterization Fluid

- Ideal for burst protection, -50°F and -100°F
- Applications include water system winterizing, boats, recreations vehicles, trailers, and more
- Propylene Glycol-based formulation available
