

Recon 275 Gal IBC (Tote)

Product Information:

SKU: RT275G

Colors: Natural

Poly Composite IBC Tote Tank Dimensions

The standard sizes for poly composite IBCs are the 275-gallon & 330-gallon capacities. The 275-gallon capacity provides the most cost efficient use of material and easily double stacks in common over-the-road trailers. The standard poly composite tote tank dimensions are a 40" x 48" base, with 275-gallon containers having an overall height of 46", and 330-gallon containers having an overall height of 53". A 330-gallon poly composite IBC has the same base dimensions as a pallet, but can hold as much as six 55-gallon drums!

Poly Composite IBCs
