January 2026 Progress Report

Dear Mr. Terpinski:

In accordance with Condition E.13 of its Ohio Hazardous Waste Facility Installation and Operation Permit (the "Permit"), Envirosafe Services of Ohio, Inc. ("ESOI") hereby submits this progress report to the Ohio Environmental Protection Agency ("Ohio EPA") for the period beginning January 1, 2026 and ending January 31, 2026.

Corrective Measures Implementation ("CMI"):

Project Activities:

During this reporting period, CMI activities included the following:

1. The leachate extraction system on SWMU's 5, 6, and 7 was shut down on December 3, 2025, following a review of forecasted low temperatures. However, the most productive wells may be intermittently operated to keep the unit levels as low as possible. Leachate levels will be collected prior to restart of all the pumps when the temperature is routinely above 32 degrees Fahrenheit and wells are accessible for maintenance;
2. NAPL Recovery System – NAPL levels observed as skim to not present, absorbent socks observed to have available capacity.

Summary of All CMI-Related Contacts with the Public:

ESOI has not had any related contacts with the public during this reporting period.

Summary of Potential or Encountered Problems and Rectification Actions:

There is nothing to report in association with this topic for this reporting period.

Projected Work:

During the next reporting period it is anticipated that the following activities will occur:

1. PZ-13 – Replacement of damaged riser, discharge line and pump if needed – active as piezometer.
